Projects

Portfolio Website (React + Tailwind CSS)   GitHub

- Developed and deployed a personal **portfolio website** using **React**, **React Router**, and **Tailwind CSS** to showcase skills, projects, and contact details.
- Implemented a fully responsive layout, mobile-first design, and smooth navigation with reusable components.
- Integrated **Vercel** for CI/CD and seamless production deployment.
- Features include: project previews, resume download, and social media integration (GitHub, LinkedIn)

Task Management App (MERN Stack)   GitHub

- Built a full-stack **task management application** using **MongoDB**, **Express**, **React**, and **Node.js** with **Vite** for fast development.
- Designed a clean UI with **Tailwind CSS**, including input validation, status filters, and toast notifications for user feedback.
- Integrated route protection, page-level state management with `useState`, and asynchronous data fetching using `fetch` API.
- Deployed frontend via **Vercel** and backend via **Render** (or your platform if different).
